/ WORK EXPERIENCE

>> Junior Software Engineer

Intertalk | April 2018 - September 2018

Wrote efficient and reliable C to run on embedded systems used by first responders.

- Developed a polyphase interpolation filter, saving 10% CPU usage on sampling operations, extending the life of both the product software and hardware.
- Extended software functionality by adding DTMF Knox and other digital signal processing capabilities.

>> Junior Software Engineer

Lockheed Martin | September 2017 - December 2017

Expanded CMS 330 3D display capabilities by writing reusable and well documented Java.

- Increased accuracy of 3D map display by rewriting legacy libraries to better reflect a 3D map projection.
- Enhanced functionality of the CMS 330 map display by creating visualizations for "object" trajectory tracking.
- Wrote python scripts to identify, replace and update legacy code.

>> Software Tester

Math Resources | January 2017 - April 2017

Tested several educational web apps while writing test-case and usage documentation.

- Performed black box testing on several web apps to aid developers and perform project management in JIRA.
- Worked with developers to set deadlines and release goals.
- Maintained, updated and edited documentation for stakeholders and clients.

/ COMPETENCIES

■■■■■ Python
■■■■■ HTML/CSS
■■■■■ Javascript
■■■■■ Java
■■■■■ SQL
■■■■■ Git
■■■■■ UNIX
■■■■■ Software Design Patterns
■■■■■ Agile Development Methodology

/ EDUCATION HISTORY

>> Bachelors of Computer Science

Dalhousie University | 2014 - 2019

>> Co-op Certification

Dalhousie University | 2016 - 2019
